

Xploff

Standing

The Xploff light is composed of mini elliptical discs suspended on wires coming out from a central point. This piece is inspired by the big bang where the plates are slowly moving outwards caught in a moment of time, and Xploff!

We take the less is more approach when customising the colour composition of the Xploff light. The light is composed of two thirds opal white, and one third the customer's desired hues.

Dimensions

600mm Ø x 1800mm high

Materials

Polycarbonate, stainless steel, rubber, Forton, Hydro stone, felt

Light specifications

ES globe - Maximum 75W Halogen
