

Opposite

Screen

The Opposite screen room divider came about after carefully considering a way to utilise the dyed polycarbonate off-cuts of the Eyoi Yoi and Xploff lights. This gives the Opposite Screen the same collaborative quality and choice of colours as the Eyoi Yoi and Xploff lights, as the colour ways can be chosen by you, and are arranged in-house at Marc Pascal studio. A subtle symmetry runs throughout the screen, with design sensibility that contrast, harmonise with, and enhance the customer colour choices. The polycarbonate is sandwiched between two laminated bamboo modules, Five panels make up the screen which are connected with leather hinges enabling a variety of configurations such as concertina or curved.

Dimensions

1888 mm W x 1892 mm H x 18mm D

Materials

Bamboo laminate, hand dyed polycarbonate, leather
