## Table

### Led power hub

Unique hand dyed elliptical discs in your choice of colours. The LED power hub is inspired by tree roots that communicate underground via a fine web of tiny roots called Mycelium. The hub consists of 2 inner cores each carrying the positive and negative 12V charge. 2 stainless steel wires carry the current to the globe which is poised just behind the orchid flower, the globes are arrayed around the hub at different points

### Dimensions

400mm Ø x 560mm high

### Materials

Polycarbonate, stainless steel, rubber, copper, aluminium, Hydro stone, felt

### Light specifications

6 x 2W G4 globes generating a warm white light
